

Device Intelligence Policy (DI-220)

1. Purpose

Establish standards for evaluating device trust during fraud investigations.

2. Trusted Device Indicators

Recognized device fingerprint, previously verified browser, consistent operating system, normal login cadence.

3. Elevated Risk Indicators

New device, emulator detection, VPN or proxy usage, rooted or jailbroken device, impossible travel.

4. Analyst Guidance

When a new device is combined with a high-value transaction, require step-up authentication before approval.
